As area businesses are finding it increasingly difficult to provide an affordable healthcare benefit to employees and their families, the Licking County Chamber of Commerce is pleased to offer a health insurance program for member businesses to help companies attract and retain qualified employees.

This Group Health Insurance Plan is exclusively available to Licking County Chamber members and is designed for companies with as few as two (2) employees. Our membership has stated that the high cost of health insurance is currently the greatest threat to profitability and they wanted help. We are hopeful that this will help to provide a solution.

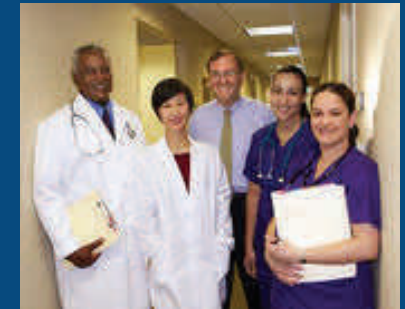

The Chamber has designed a benefit program that includes a full range of employee benefits, including insurance for medical and life.
